SUMMARY

Machine Learning Engineer with 1+ years of experience building and deploying production Generative AI and document AI systems end-to-end for international clients, from scoping to cloud deployment and support. Specialized in Large Language Models (LLMs), agentic workflows, OCR, and evaluation with human-in-the-loop guardrails. Works independently in remote teams and directly with stakeholders. Prior research at DRDO in multimodal retrieval.

TECHNICAL SKILLS

Generative AI & LLMs: Generative AI, Large Language Models (LLMs), OpenAI, Azure OpenAI, Gemini, Claude, RAG, prompt engineering, embeddings, vector search (FAISS), LangChain, LangGraph, MCP, model evaluation, guardrails
ML & Deep Learning: Deep Learning, Computer Vision, Natural Language Processing (NLP), PyTorch, TensorFlow/Keras, scikit-learn, Hugging Face Transformers, CLIP, pandas, NumPy
Document AI: OCR, Azure Document Intelligence, layout analysis, key-information extraction, face verification (InsightFace)
Engineering: Python, TypeScript, SQL, FastAPI, React, REST APIs, PostgreSQL, MySQL/MariaDB, Redis, Celery, pytest, Git, multi-tenant SaaS
Cloud & MLOps: Microsoft Azure, AWS EC2, Docker, Nginx, Linux, GitHub Actions CI/CD, model deployment, Power BI
Languages: English (fluent), Hindi (intermediate), Malayalam (native), Tamil (fluent), Arabic (basic)

EXPERIENCE

Machine Learning Developer Aug 2025 - Present
Pure Magic IT Solutions, Dubai, UAE (Remote)

- Lead development of Dexter AI, the company's line of production AI SaaS, as the primary engineer on a two-person AI team: stakeholder scoping, architecture, FastAPI/React builds, LLM and OCR integration, and Azure deployment.
- **DocFoundry (KYC verification SaaS):** Built identity verification with Azure Document Intelligence OCR and InsightFace face matching; FastAPI backend with JWT, 4-role RBAC, and 85% pytest coverage, deployed to Azure via Docker and GitHub Actions for 2 client organizations.
- **Receipt OCR (receipt digitization SaaS):** Solved multi-receipt detection in single photos by moving from OpenCV heuristics to Azure layout analysis, with GPT-4.1 normalizing extracted fields; deployed for a paying client, processing AED 20M+ in receipts.
- **WorkTrack (AI event-staffing platform):** Designed an agentic LLM ranking pipeline (deterministic pre-filter, OpenAI ranking, immutable decision snapshots) across 60+ REST endpoints, cutting a 3-hour workflow to under 10 seconds.
- **ClaimAssist (insurance claims AI):** Built multimodal damage assessment with a tamper-resistant audit log, using GPT for images and Gemini 2.5 Pro for 360° walkaround video, plus fraud signals, plate and VIN OCR validation, and confidence-based routing to human review.
- **Client delivery:** Deployed a client web platform on two Azure VMs with MariaDB replication, diagnosed firewall restrictions inside the client environment, and set up the team's GitHub CI/CD across Azure and AWS EC2.
- **Analytics:** Built a multi-brand marketing dashboard unifying six platforms via Windsor.ai ETL into a Power BI star schema with ~40 DAX measures.

AI & ML Research Intern Apr 2025 - Jul 2025
Centre for Air Borne Systems (CABS), DRDO, Bengaluru, India

- Built a CLIP and PyTorch semantic image search system for maritime surveillance (embedding pipelines, vector search, re-ranking), improving query-image match accuracy by 15% via feature fusion and WordNet query expansion; runs offline on air-gapped systems.
- Published a sanitized open-source version at github.com/Munazil1/maritime-clip-search.

EDUCATION

Bachelor of Engineering (B.E.), Artificial Intelligence and Machine Learning 2021 - 2025
Visvesvaraya Technological University (SEACET), Bengaluru | CGPA: 7.6 / 10
Higher Secondary (Science): 93.5%, 2021 | SSLC: 100%, 2019 | CHM Higher Secondary School, Elayavoor

PUBLICATIONS

"Voice-Based Email for Visually Impaired People", PRAVARTANA'24, IEEE Bangalore Section, Dec 2024.
